How does Google obtain the content?

-  **1** Google crawls participating providers' websites
 - Partners lose control over which content is included
 - Google must map different sources, layouts, & taxonomies

-  **2** Partners send standardized files daily, e.g. JSON feeds
 - + Providers retain control over supplied content
 - + Standardized format benefits Google and providers

Today, Google displays its own content for local businesses independent of content quality

Business name	Business phone	Google id
El Bravo	602 - 943 - 4565	dfdk2343k
Pete's Tacos	415- 453 - 6789	b4y545by
McDonalds #2343	913- 987 - 4326	dgndge5
Z'Tejas	480 - 768 - 9876	566yutu

To increase competition & content quality for consumers, we recommend that Google displays content from the provider with the best content

Business name	Business phone	Google id							Winner
El Bravo	602 - 943 - 4565	dfdk2343k							
Pete's Tacos	415- 453 - 6789	b4y545by							
McDonalds #2343	913- 987 - 4326	dgndge5							
Z'Tejas	480 - 768 - 9876	566yutu							

First, Google must identify each local business and match that business to various providers' content for the same business.

Business identity Google identifier Participating providers supply their ids matched to Google's id

Business name	Business phone	Google id	Yelp id	Tripadvisor id	OpenTable id				Winner
El Bravo	602 - 943 - 4565	dfdk2343k	lkjds9fd	iefndsf43	onfsido3				
Pete's Tacos	415- 453 - 6789	b4y545by	b45y4	4b63b63	fsldfjskl				
McDonalds #2343	913- 987 - 4326	dgnodge5	45byh	3tv45tg	4663c3				
Z'Tejas	480 - 768 - 9876	566yutu	ny4nu654	Bg5bg h	c3c4663				

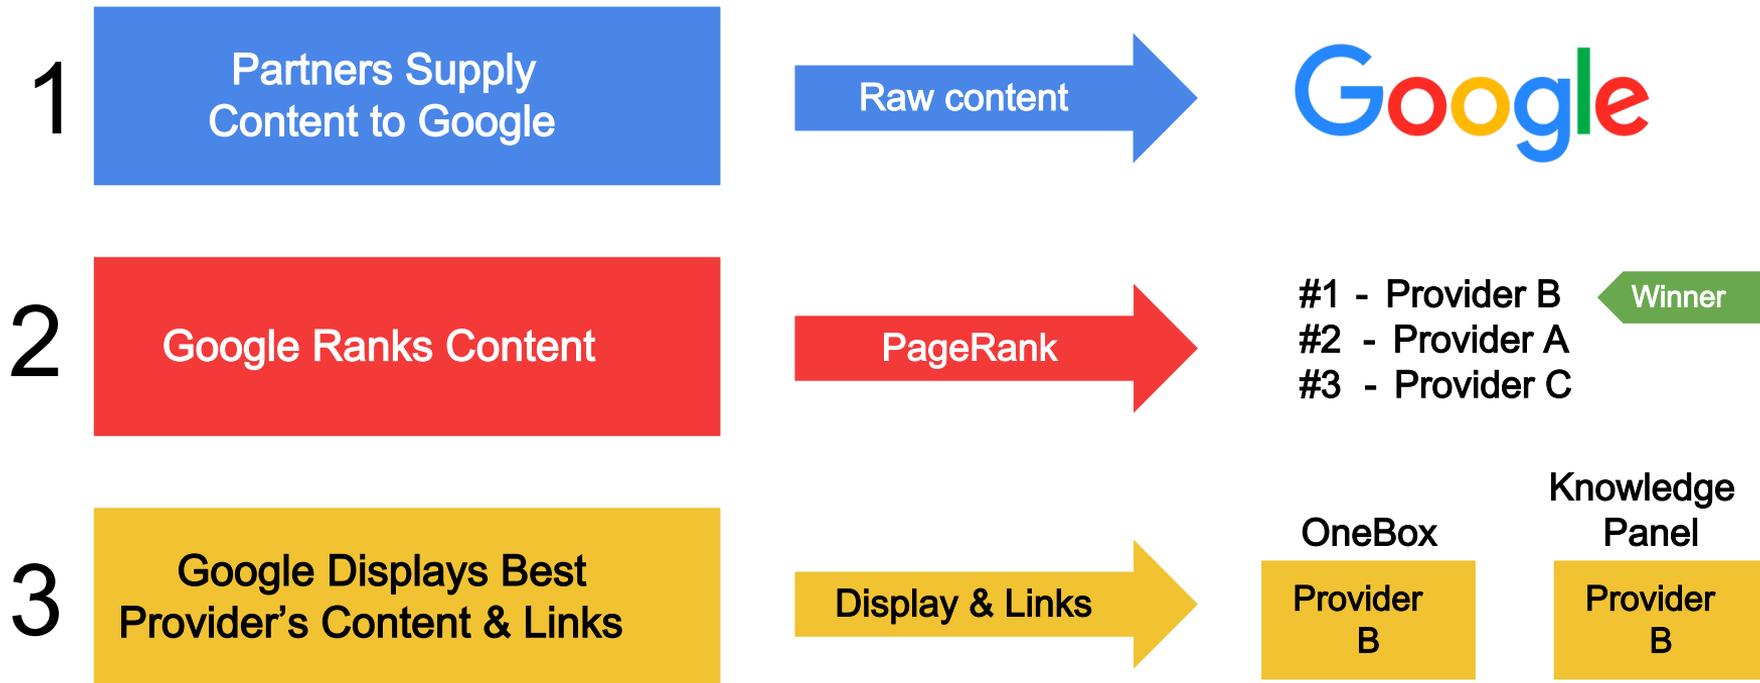

Then Google can determine which content provider ranks highest. Google *already* calculates these rankings today.

For each Google id, Google determines the search ranking per provider

Highest - rank provider's content/links are featured

Business name	Business phone	Google id	Yelp id	Tripadvisor id	OpenTable id	PageRank Yelp URL	PageRank Trip URL	PageRank OT URL	Winner
